The Department of Bioethics at the NIH Clinical Center is seeking a Research Assistant. The Department is a leader in bioethics research using a variety of research methods (ranging from normative analyses to primary empirical methods, both qualitative and quantitative). Responsibilities will include:

- Assist with data acquisition (using a variety of methods under the supervision of the investigator), recruitment, entry, management and display for Departmental research studies.
- Conduct literature searches, gather and synthesize background information, and assist with manuscript preparation for research studies and manuscript submission.
- Prepare materials for IRB submission, manuscript transmittals, and other necessary approvals or reviews as needed
- Assist in maintenance of Departmental metrics, databases, and website
- Help coordinate the logistics of courses and workshops, including the course Ethical and Regulatory Aspects of Clinical Research

Opportunities include attending bioethics seminars and working closely with Department staff and fellows in a collaborative, highly collegial, and interdisciplinary environment. The research assistant will be hired on a contract basis with the possibility of a longer term arrangement.

Qualifications: Reliability, maturity, and good task and time-management skills. Excellent library, computer, oral and written communication skills; evidence of ability to perform library and web-based research. Experience working with and managing data. Willingness to work with multiple people and on multiple tasks. Experience with statistical software (e.g., STATA) is desirable. Must have at least a BA/BS; prior experience in research desirable. Persons with master’s level training are also encouraged to apply.

Interested applicants should send a CV and letter of interest and prior experience to the following address. Please include the names and contact information for 2-3 references.
